Subject Index

Acetaldehyde
Oxidation of ethylene to acetaldehyde over a heterogenized surface-vanadate Wacker catalyst in the absence of gaseous oxygen 181

Acid sites (Brønsted and Lewis)
Direct partial oxidation of benzene to phenol on zeolite catalysts 139

Active centres
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Adsorption
Methanol synthesis by means of diffuse reflectance infrared Fourier transform and temperature-programmed reaction spectroscopy 45

Adsorption
Nitrogen containing species as intermediates in the oxidation of ammonia over silica supported molybdena catalysts 165

Alkane hydrogenolysis
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Alkane isomerization
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Alkane–deuterium exchange
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Alkene hydrogenation
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Ammonia oxidation
Nitrogen containing species as intermediates in the oxidation of ammonia over silica supported molybdena catalysts 165

Benzene partial oxidation
Direct partial oxidation of benzene to phenol on zeolite catalysts 139

Butane
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83

Butane aromatization
Gallium containing hybrid catalyst for the aromatization of n-butane 127

By-product formation
Liquid-phase oxidation of 1-methoxy-2-propanol with air. III. Chemical deactivation and oxygen poisoning of platinum catalysts 147

Carbon dioxide hydrogenation
Methanol synthesis by means of diffuse reflectance infrared Fourier transform and temperature-programmed reaction spectroscopy 45

Carbon monoxide oxidation
Study on the possible existence of multiplicity features in ethene hydrogenation over platinum/boehmite catalysts 71

Catalyst characterization (DRIFTS, TPRS)
Methanol synthesis by means of diffuse reflectance infrared Fourier transform and temperature-programmed reaction spectroscopy 45

Catalyst charge size
Study on the possible existence of multiplicity features in ethylene hydrogenation over platinum/boehmite catalysts 71

Chemisorption
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Coadsorption
Methanol synthesis by means of diffuse reflectance infrared Fourier transform and temperature-programmed reaction spectroscopy 45

Copper
Reliability of pulse-chromatographic nitrous oxide titrations of the copper surface area on $Cu–ZnO–MeO_x$ catalysts in connection with the characterization of their thermostability 6 5

Copper/silica
Hydrogenolysis of diethyl oxalate over copper-based catalysts 101

Copper/zinc oxide/alumina
Methanol synthesis by means of diffuse reflectance infrared Fourier transform and temperature-programmed reaction spectroscopy 45

Cracking
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83

Deactivation
Hydrogenolysis of diethyl oxalate over copper-based catalysts 101

Deactivation
Liquid-phase oxidation of 1-methoxy-2-propanol with air. III. Chemical deactivation and oxygen poisoning of platinum catalysts 147

Enantioselective hydrogenation
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1
Erionite
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83
Ethene
Oxidation of ethylene to acetaldehyde over a heterogenized surface-vanadate Wacker catalyst in the absence of gaseous oxygen 181
Ethene hydrogenation
Study on the possible existence of multiplicity features in ethene hydrogenation over platinum/boehmite catalysts 71
Ethylene glycol
Hydrogenolysis of diethyl oxalate over copper-based catalysts 101
EuroPt-1
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1
Exhaust-gas
Selective reduction of nitrogen oxides under oxidising exhaust-gas conditions L1
Gallium
Gallium containing hybrid catalyst for the aromatization of n-butane 127
Heptane
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83
n-Hexane aromatization
Sulphur adsorption, desorption and exchange on platinum/alumina, rhenium/alumina and platinum–rhenium/alumina catalysts 115
Hydrocracking
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83
Hydrogen spillover
Oxidation of ethylene to acetaldehyde over a heterogenized surface-vanadate Wacker catalyst in the absence of gaseous oxygen 181
Hydrogen spillover
Gallium containing hybrid catalyst for the aromatization of n-butane 127
Hydrogenolysis
Hydrogenolysis of diethyl oxalate over copper-based catalysts 101
Infra-red
Direct partial oxidation of benzene to phenol on zeolite catalysts 139
Kinetics
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83
Kinetics
Hydrogenolysis of diethyl oxalate over copper-based catalysts 101
Kinetics
Selective reduction of nitrogen oxides under oxidising exhaust-gas conditions L1
Lanthanum oxide
Comparison of lanthanum oxide and strontium-modified lanthanum oxide catalysts for the oxidative coupling of methane 199
Liquid-phase oxidation
Liquid-phase oxidation of 1-methoxy-2-propanol with air. III. Chemical deactivation and oxygen poisoning of platinum catalysts 147
Mechanism
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83
Mechanism
Selective reduction of nitrogen oxides under oxidising exhaust-gas conditions L1
Methane conversion
Comparison of lanthanum oxide and strontium-modified lanthanum oxide catalysts for the oxidative coupling of methane 199
Methanol synthesis
Methanol synthesis by means of diffuse reflectance infrared Fourier transform and temperature-programmed reaction spectroscopy 45
Molybdena/silica
Nitrogen containing species as intermediates in the oxidation of ammonia over silica supported molybdena catalysts 165
Multiplicity features
Study on the possible existence of multiplicity features in ethene hydrogenation over platinum/boehmite catalysts 71
Nickel
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83
Nitrogen oxides
Selective reduction of nitrogen oxides under oxidising exhaust-gas conditions L1
Nitrous oxide
About the reliability of pulse-chromatographic nitrous oxide titrations of the copper surface area on $Cu–ZnO–MeO_x$ catalysts in connec-

tion with the characterization of their thermostability 65

Oil hydrogenation
Catalytic behaviour of rhodium supported on palygorskite, silica and titania in oil hydrogenation 37

Oxalate
Hydrogenolysis of diethyl oxalate over copper-based catalysts 101

Oxidation catalysis
Oxidation of ethylene to acetaldehyde over a heterogenized surface-vanadate Wacker catalyst in the absence of gaseous oxygen 181

Oxidation of alcohols
Liquid-phase oxidation of 1-methoxy-2-propanol with air. III. Chemical deactivation and oxygen poisoning of platinum catalysts 147

Oxidative coupling
Comparison of lanthanum oxide and strontium-modified lanthanum oxide catalysts for the oxidative coupling of methane 199

Oxygenates hydrogenolysis
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Palygorskite
Catalytic behaviour of rhodium supported on palygorskite, silica and titania in oil hydrogenation 37

Phenol
Direct partial oxidation of benzene to phenol on zeolite catalysts 139

Platinum
Liquid-phase oxidation of 1-methoxy-2-propanol with air. III. Chemical deactivation and oxygen poisoning of platinum catalysts 147

Platinum–alumina
Sulphur adsorption, desorption and exchange on platinum/alumina, rhenium/alumina and platinum–rhenium/alumina catalysts 115

Platinum–boehmite
Study on the possible existence of multiplicity features in ethene hydrogenation over platinum/boehmite catalysts 71

Platinum–rhenium/alumina
Sulphur adsorption, desorption and exchange on platinum/alumina, rhenium/alumina and platinum–rhenium/alumina catalysts 115

Platinum–silica
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Poisoning
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Rhenium/alumina
Sulphur adsorption, desorption and exchange on platinum/alumina, rhenium/alumina and platinum–rhenium/alumina catalysts 115

Rhodium supported catalysts
Catalytic behaviour of rhodium supported on palygorskite, silica and titania in oil hydrogenation 37

Selective poisoning
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Selective reduction
Selective reduction of nitrogen oxides under oxidising exhaust-gas conditions L1

Strontium-modified lanthanum oxide
Comparison of lanthanum oxide and strontium-modified lanthanum oxide catalysts for the oxidative coupling of methane 199

Structural determination
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Sulphidation
Hydrocracking of n-butane and n-heptane over a sulfided nickel erionite catalyst 83

Sulphur desorption
Sulphur adsorption, desorption and exchange on platinum/alumina, rhenium/alumina and platinum–rhenium/alumina catalysts 115

Sulphur isotopic exchange
Sulphur adsorption, desorption and exchange on platinum/alumina, rhenium/alumina and platinum-rhenium/alumina catalysts 115

Thermostability
Reliability of pulse-chromatographic nitrous oxide titrations of the copper surface area on $Cu–ZnO–MeO_x$ catalysts in connection with the characterization of their thermostability 65

Wacker catalysts (heterogeneous)
Oxidation of ethylene to acetaldehyde over a heterogenized surface-vanadate Wacker catalyst in the absence of gaseous oxygen 181

X-ray diffraction
Recently published work on EUROPT-1, a 6% Pt/SiO_2 reference catalyst 1

Zeolites
Gallium containing hybrid catalyst for the aromatization of n-butane 127
Zeolites
Direct partial oxidation of benzene to phenol on zeolite catalysts 139
Zinc oxide
About the reliability of pulse-chromatographic nitrous oxide titrations of the copper surface area on Cu-ZnO-MeOx catalysts in connection with the characterization of their thermostability 65
